

Capability Statement

Services & Capabilities

- ◆ **8(a) Hispanic Woman Owned SDMB Participation**
 - SBA Certified Mentor to 8(a) Protégé
- ◆ **Configured Industrial & Military Computer Systems**
 - Military Grade 1U thru 6U Rackmount Systems
 - Cots and Long Life Motherboard Systems
 - Long Life Single Board Computer Systems
 - Rack & Transit Case Integration
 - Assembled, Tested and Burned-In
 - 5-7 Year Long Life Product Availability
 - Configuration Management & Revision Control
- ◆ **Rackmount LCD Displays / Keyboards**
 - Military Grade 1U 15" thru 20.1" LCDs
 - Rugged Keyboards to NEMA Standards
 - Light Weight for Mobile Applications
 - Short Installed Depth
- ◆ **Panel Mount LCD Displays**
 - 15" thru 24" LCDs
 - Rugged NEMA 4 Solutions
- ◆ **Long Life Industrial Motherboards**
 - 5-7 Year Availability—Made in the USA
 - State of the Art Designs—PCI, PCI-X, PCI-Express
- ◆ **System Enclosures**
 - 1U thru 6U COTS, Semi-COTS, Fully Custom Designs
 - Rugged Military Designs—Made in the USA
- ◆ **Single Board Computers & Backplanes**
 - 5-7 Year Availability—Made in the USA
 - State of the Art Designs—PCI, PCI-X, PCI-Express
- ◆ **Custom Designs & Modifications**
 - Experience in Airborne, Shipboard, Ground Based Mobile Environments
 - Modify Existing Designs to Customer Specification
 - Clean Paper Designs to Customer Requirements
 - Custom Backplane, SBC, & Motherboard Designs

 3 Seats Solidworks 2009
 1 Seat Cosmos Floworks 2009
 1 Seat Autocad
 Tenney T20RC-2 36cf temperature/
 humidity Chamber , -70 to +277°C

Capability Statement

Narrative

Chassis Plans has excelled at "relational" business for over 12 years. We are not a "component reseller". We work closely with customers to provide solutions to their military and industrial computing requirements. These solutions can range from simple rackmount 1U to 6U enclosures through complete custom turnkey integrated systems. Using our broad selection of high quality long-life components, we can often configure systems that fit a particular requirement. For many customers, the only solution involves custom design, either for a chassis, backplane, or integrated electronics. Chassis Plans offers long-life program life cycle support of 5-7 years with guaranteed parts availability. Standardized configuration management is offered with all programs.

Chassis Plans has been ranked #4 among the top 100 fastest growing private companies in San Diego County by the San Diego Business Journal. In addition to the Company's ranking, Chassis Plans also secured the top position as the County's fastest growing technology and/or manufacturing company. Chassis Plans is ranked 151 on the 2006 Inc. 500 List and first in the category of Computer and Electronics. These prestigious awards validate Chassis Plans unequalled engineering, quality, and support. Chassis Plans has published several papers on Rugged Military Computer System Cooling Design, Shock and Vibration Remediation, and other design issues.

Chassis Plans is an SBA certified Mentor to Component Sourcing Group, a certified 8(a) firm (Hispanic Woman Owned) under the SBA Mentor/Protégé program. This program allows Chassis Plans to partner with CSG to offer our systems expertise through their 8(a) status for contract compliance with applicable diversification requirements.

Chassis Plans is actively securing ISO 9001:2008 certification with those systems and standards in place.

Chassis Plans is a quality provider of long-life availability industrial and military rackmount computer enclosures, rackmount keyboards and LCD display monitors, long-life single board computers, long-life industrial motherboards, active / passive backplanes, analog and digital I/O cards and integrated rackmount computer systems for clients in the military, industrial control and automation industries.

Chassis Plans was founded in 1997. The Company was originally founded to provide design services to clients looking for local manufacturing of high quality industrial enclosures and systems. To answer customer requirements for turnkey systems, Chassis Plans expanded operations to include system integration.

Chassis Plans provides concept, design, prototyping, production, integration, and certification into one unique turnkey solution. Some examples of existing markets include Oil Refining, Automation Control, Internet Infrastructure, Computer Telephony, Government, Military and Banking. We count virtually all Military Branches, SPAWAR, Prime and Sub-Prime contractors as valued customers.

Defense Customers—Short List

- SPAWAR
- U.S. Army
- U.S. Air Force
- U.S. Navy
- U.S. Marines
- General Dynamics
- L3 Communications
- Raytheon
- Boeing
- Lockheed
- Northrop Grumman
- BAE
- Cubic Defense
- L3 Link Simulation
- Telephonics
- Curtis Wright
- Chandler May
- AAI
- SAIC
- General Atomics

Commercial Customers—Short List

- Siemens
- Nasa
- Nikon
- Schlumberger
- Hamilton Sunstrand
- Micron
- IBM
- HP
- SRI
- Motorola
- Intel
- JPL
- Applied Materials
- JDS Uniphase
- Sierra Nevada
- Pressco
- Activue
- Thales
- ATT
- ITT
