

Did You Know?

Systems Engineered to Perform™

We provide Custom Chassis Designs

In addition to providing the industry's leading family of off-the-shelf industrial computing platforms, Chassis Plans also offers unparalleled custom chassis design services.

Since 1985, our engineers have been providing innovative solutions and cutting edge chassis design services. Chassis Plans' turnkey design services take you from prototype to production and we pride ourselves on creating quality rack mount enclosures that fit your technical, budgetary and scheduling requirements.

We are conversant in all aspects of design and agency certification, enabling our customers to move quickly from concept to shipment. Successful programs based on custom Chassis Plans designs range from simple sheet metal boxes, cost-effective 1U, 2U and 4U designs, through highly complex ship-board Navy certified designs and telco Nebs certified systems.

No matter where your unique application challenges may lead, Chassis Plans is committed to being a full partner in your success.

Expertise to
"Bring it All
Together"

Custom Chassis Designs

Tailored to meet
your specific requirements.

- o Turnkey services encompassing conceptual design, prototyping and full production
- o Cost-effective leverage from a wide range of standard products combined with industry-leading custom design expertise
- o Complete documentation is part of every custom design package
- o Specification of drives, power supplies, processor boards and peripherals to meet unique application requirements
- o Designed to provide optimal air-flow and cooling efficiency
- o Custom tailored ruggedization and environmental sealing to meet even the most extreme deployment conditions
- o From-the-ground-up concept and design of embedded subsystems, wall-mount configurations or other special requirements
