

Did You Know?

We provide Turnkey Integrated Systems

In addition to providing the industry's best industrial computing components, Chassis Plans can provide fully turn-key integrated systems.

At Chassis Plans, we are justifiably proud of the performance, capabilities and excellent design of all our products. Additionally, we offer world class multi-vendor integration services to provide fully configured turnkey systems. Many companies will sell you components but it requires high-level skills and discipline to professionally integrate these components into reliable, well built systems. Chassis Plans has mastered those skills through years of experience.

The process starts with a rigorous antistatic program to protect sensitive components. This includes antistatic floor paint and wax, grounded metal benches and conductive work surfaces, grounded smocks, and regular comprehensive testing. The process ends with exceptional wire routing, system testing and documentation.

No matter where your unique application challenges may lead, Chassis Plans is committed to being a full partner in your success.

Expertise to
"Bring it All
Together"

Integrated Computer Systems

Tailored to Meet Your Specific Requirements

- o Expert component selection for compatibility
- o Rigorous antistatic program
- o Highly experienced technical staff
- o Exceptional integration documentation
- o Extended system test suite
- o Burn-in to meet customer specification
- o Full system verification to your specification including Mil Spec, extended temperature cycling, shock & vibration, humidity, salt spray, dust
- o Custom power supply & drive cabling
- o Full traceability to serial number and component
- o End Of Life notification
- o See www.chassis-plans.com/integration.html
