

Did You Know?

Systems Engineered to Perform™

We provide Rugged Military Computers

In addition to providing the industry's best military COTS platforms, Chassis Plans can customize them any way you'd like.

At Chassis Plans, we are justifiably proud of the performance, capabilities and excellent design of all our products. We have provided COTS solutions to all the US military branches since 1985 for a variety of shipboard, land mobile and airborne installations.

Our engineering department is conversant with all Mil Specs including 901, 167, 187, 810, and 461. Products have passed the rigorous hammer and barge testing. Testing regimens specific to each customer and application can assure equipment will reliably function in the intended environment.

Chassis Plans is the industry leader in providing custom solutions when COTS is not sufficient.

No matter where your unique application challenges may lead, Chassis Plans is committed to being a full partner in your success.

Expertise to
"Bring it All
Together"

Ruggedized Military Computing Hardware

Tailored to meet your
specific mission requirements.

- o Compliant with appropriate Mil Specs including 167, 187, 461, 810 and 901
